

ParkLife
Product Information 2010

ParkLife

Parklife is all about activating public open spaces for recreation and engaging communities to keep them active, social and fit.

Designed for players, skaters and park goers for basketball, soccer kick-around, skating and hanging out.

Built tough but designed elegantly – Parklife components complement the surrounds and withstand the conditions.

100% kiwi design. 100% kiwi manufacturing.

Key Projects

Key Projects Overview.....	p10
----------------------------	-----

The Hoop

The Hoop (tower) is a strong gooseneck form that absorbs the tension of a dunk or hanging off the hoop.

The goal attaches directly to the pole, independent of the backboard, eliminating a failure point common in other products.

Dimensions are to FIBA (Federation International Basketball Association) standards.

Contact us for pricing and specification.

Grind Rails

The Grind Rails add dynamic street skating options with 4 styles that stand-alone or can be installed in combinations.

Contact us for pricing and specification.

Goalkeeper

The Goalkeeper adds the option for soccer kick-around to activate open space.

The Goalkeeper's design is based on the increasingly popular Sub Football game.

The flat plane of continuous tubular steel and rigid mesh allows use in tight spaces and tough environments.

Contact us for pricing and specification.

High Five Seat

The High Five Seat is youth-style for hanging out and watching the action.

Two seats integrate into the Parklife Half Court and Basketbowl Court designs for courtside viewing.

Contact us for pricing and specification.

Half Court

The Half Court is to FIBA dimensions for competitive play with curved lines that blend with the surrounds.

The surface is alternating coloured concrete to delineate areas and avoid line markings that wear off. Two High Five seats are set into the boundary for ultimate courtside viewing. Grind Rails can clip on courtside to add skate activity.

Contact us for pricing and specification.

Basketbowl

The Basketbowl Court has all the specs of the Half Court with the addition of quarter and half pipe concrete skate ramps around the boundary for skating.

Contact us for pricing and specification.
